A GUIDE TO PRIMARY AND SECONDARY PROCESSORS IN ARKANSAS

# March 2011

# Forest Industry Directory

# BY NAME

Since its last release in March 2008, Arkansas has witnessed the closure (including both temporary and permanent closures) of over 93 wood processors according to Directory listings. However during this same period several new mills have begun operation. The March 2011 directory lists a total of 349 wood processors operating in Arkansas.

Every effort has been made to include all wood processors operating in Arkansas in this directory. If your wood processing company is not listed, or the information is incorrect, please, please use either the AFC comment section on our home page to provide us with the correct information or contact the AFC at 501-296-1940. It is not our intention to leave any wood processing company out of this directory.

## DEFINITIONS

### PROCESSOR TYPE

Industries are classified as either primary or secondary processors. "P" indicates a primary processor which processes logs predominately. "S" indicates a secondary processor which is involved in a value added process.

### CAPACITY

Capacity, defined as the maximum amount of wood that can be processed at a given facility, is given for each processor. Note that capacity is based on Doyle Log Scale or board feet lumber tally.

### CAPACITY CATEGORIES

- A = less than 1 MMBF
- B = 1 - 2.9 MMBF
- C = 3 - 4.9 MMBF
- D = 5 - 9.9 MMBF
- E = 10 - 14.9 MMBF
- F = 15 - 20 MMBF
- G = over 20 MMBF

### MILL TYPE
