- Forest management incentives
- Best Management Practices
- Forest Stewardship

AFC is able to select and grow only the best seed from its loblolly pine seed orchard. An example of our 3 Star loblolly pine with 51 percent gain is:

If 100 acres of unimproved pine (woods run) is equal to 100 acres of timber at harvest, then 100 acres of 51 percent genetically improved pine would equal 151 acres of timber at harvest.

Family Block Improved Loblolly Pine

| Group | Genetic Gain | Price/1000 | Price/500 | Number of families |
|---------------|--------------|------------|-----------|--------------------|
| 3 Star ★★★ | 41-51% | \$60 | \$50 | 4 |
| 2 Star ★★ | 33-40% | \$50 | \$40 | 5 |
| 1 Star ★ | 25-32% | \$45 | \$35 | 6 |

AFC continues to offer mixed families of loblolly pine with an average gain of 26 percent at \$40 per 1,000, or \$30 per 500.
