When on the scene of a wildfire, the Arkansas Forestry Commission recommends reporters and photographers wear appropriate fire safe clothing. They are: high top, lace up, leather boots (8-inch preferred); Fire retardant full length trousers – Nomex or other specialty clothing preferred – 100% cotton or linen is acceptable; Fire retardant long sleeve shirt or blouse with a closeable neckline – Nomex or other specialty clothing preferred – 100 % cotton or linen is acceptable

AFC Crews battle wildfires across Southern Arkansas

LITTLE ROCK, ARK. – Arkansas Forestry Commission personnel are currently battling nine wildfires in eight Arkansas counties – Cleveland, Grant, Sebastian, Saline, Lafayette, Ouachita, Pope and Yell. The Single Engine Air Tankers are dropping water on a fire near the community of Kingsland in Cleveland County at this time.

Since 3:30 p.m., Monday, Arkansas Forestry Commission crews have extinguished 19 fires for approximately 77 acres, and detection flights are being conducted over Districts 1, 2, 4, 5 and 9.

According to the Arkansas Forestry Commission Dispatch Center in Malvern, County Judges in 28 counties have issued burn bans: Ashley, Chicot, Clark, Cleveland, Columbia, Conway, Crawford, Dallas, Drew, Faulkner, Garland, Hempstead, Hot Spring, Howard, Jefferson, Johnson, Lafayette, Lincoln, Miller, Nevada, Ouachita, Perry, Polk, Pulaski, Saline, Sebastian, Sevier and Union.

Due to the high heat index values and fire danger risk, the Arkansas Forestry Commission is urging all Arkansans to avoid burning. Battling wildfires in extreme temperatures can put the health of firefighters and other emergency responders at risk.

With little significant rainfall in sight, Arkansas residents living in forested areas should begin taking measures to protect their homes from wildfire. Even the smallest steps taken can lead to a huge advantage in ensuring your home will remain standing.

With a high fire danger risk, there are a few things to remember:

- Burning is strongly discouraged. This is especially true on days where humidity levels have dropped below 30 percent and winds are gusty. Fires can spread quickly in these conditions.
- Be mindful that sparks from lawn mowers and hay baling equipment can start a wildfire.
- Never discard cigarettes from vehicles.
- Never park vehicles where grass or other vegetation can touch the exhaust system.

Arkansas FireWise Coordinator David Samuel recommends homeowners create a minimum 30-foot “defensible space” around their house. Defensible space is an area around a structure that provides an opportunity to modify the existing vegetation to slow the rate and intensity of an advancing wildfire.

Homeowners should thin flammable trees, such as pine, near their home and remove undergrowth that can serve as a link for grass fire to reach treetops. Also, be sure to remove dead leaves and pine needles from roofs, gutters and along the base of your home.

Other suggestions include:

- Keep trees and shrubs pruned. Prune all trees from six to 10 feet above the ground.
- Remove overhanging branches from your roof.
- Mow your yard regularly.
- Store firewood away from the house.
- Dispose of cutting and debris promptly, according to local regulations.
- Homeowners should use 1/8-inch screen to cover open areas underneath decks. This prevents embers from igniting vegetation beneath the deck, which can in turn ignite the structure.

For more tips on Firewise landscaping and construction, visit www.arkansasfirewise.com. To view current burn bans and wildfire danger ratings, visit www.forestry.state.ar.us. To report a wildfire, call the Arkansas Forestry Commission Dispatch Center at 1-800-468-8834, or 911.

The Arkansas Forestry Commission offers its programs to all eligible persons regardless of race, color, national origin, sex, age or disability and is an Equal Opportunity Employer. Arkansas FireWise is a program of the Arkansas Forestry Commission, that works closely with Firewise Communities/USA. Firewise Communities/USA is a part of the National Firewise Communities Program, an interagency program designed to encourage local solutions for wildfire safety by involving homeowners, community leaders, planners, developers, firefighters, and others in the effort to protect people and property from the risk of wildfire. The National Firewise Communities Program includes Firewise Communities workshops, Firewise Communities/USA recognition program, and support for fire organizations and community groups. The National Firewise Communities Program is sponsored by the National Wildfire Coordinating Group's Wildland/Urban Interface Working Team, a consortium of wildland fire agencies that includes the USDA Forest Service, the Department of the Interior, state forestry organizations, the US Fire Administration, and the National Fire Protection Association. For more information, visit www.firewise.org.
